ORGANIZA Y PRODUCE

INTERNATIONAL
MARITIME
ORGANIZATION

The **International Maritime Organization (IMO)** proposes to reduce greenhouse gas emissions in the maritime and port business 40% by 2030 and 70% by 2050. The designed strategy suggests adjustments in fuels, ship manufacturing, and ship-port operations..

Energy Supply
Preferably from
Renewable
Sources

**Safe and Efficient
Bunkering**
of Low-Carbon and
Carbon-Free
Alternative Fuels

Incentives
Promoting
Sustainable
Maritime
Transport with
Low Carbon and
Zero Carbon
Emissions

**Support for the
optimization of port
calls**
(e.g., improving data
quality and
availability,
facilitating just-in-
time ship arrivals)

GREEN VOYAGE
2 0 5 0

The maritime business and ports must build a collaborative Net-zero ecosystem aimed at reducing emissions, establishing an incentive system, and increasing operational productivity through best practices.
